

Full Board:

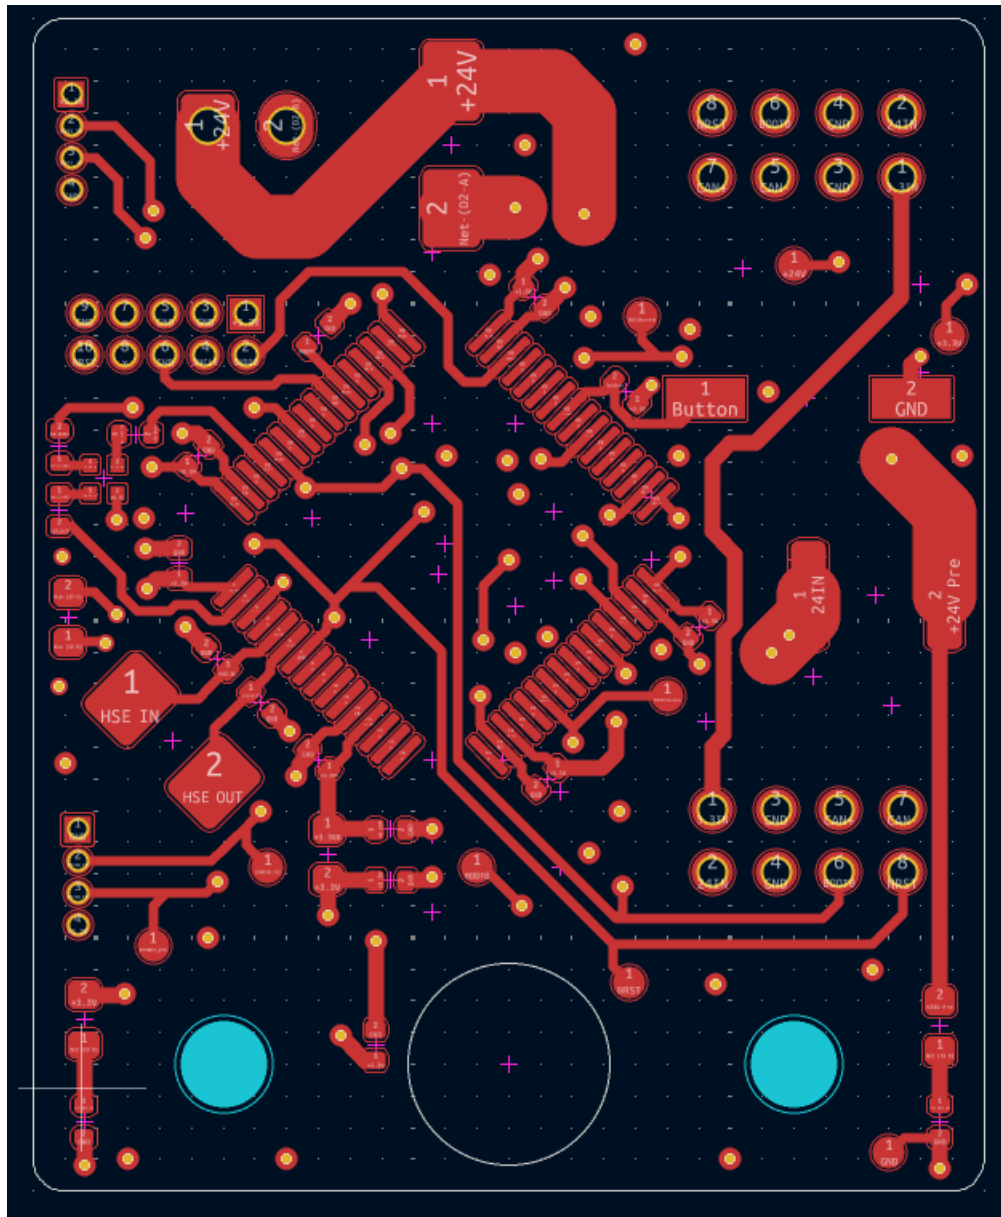

3D model (minus a few 3D models I couldn't find, the button is the big outline under "24V" and the status LED is to the left under the jtag headers)

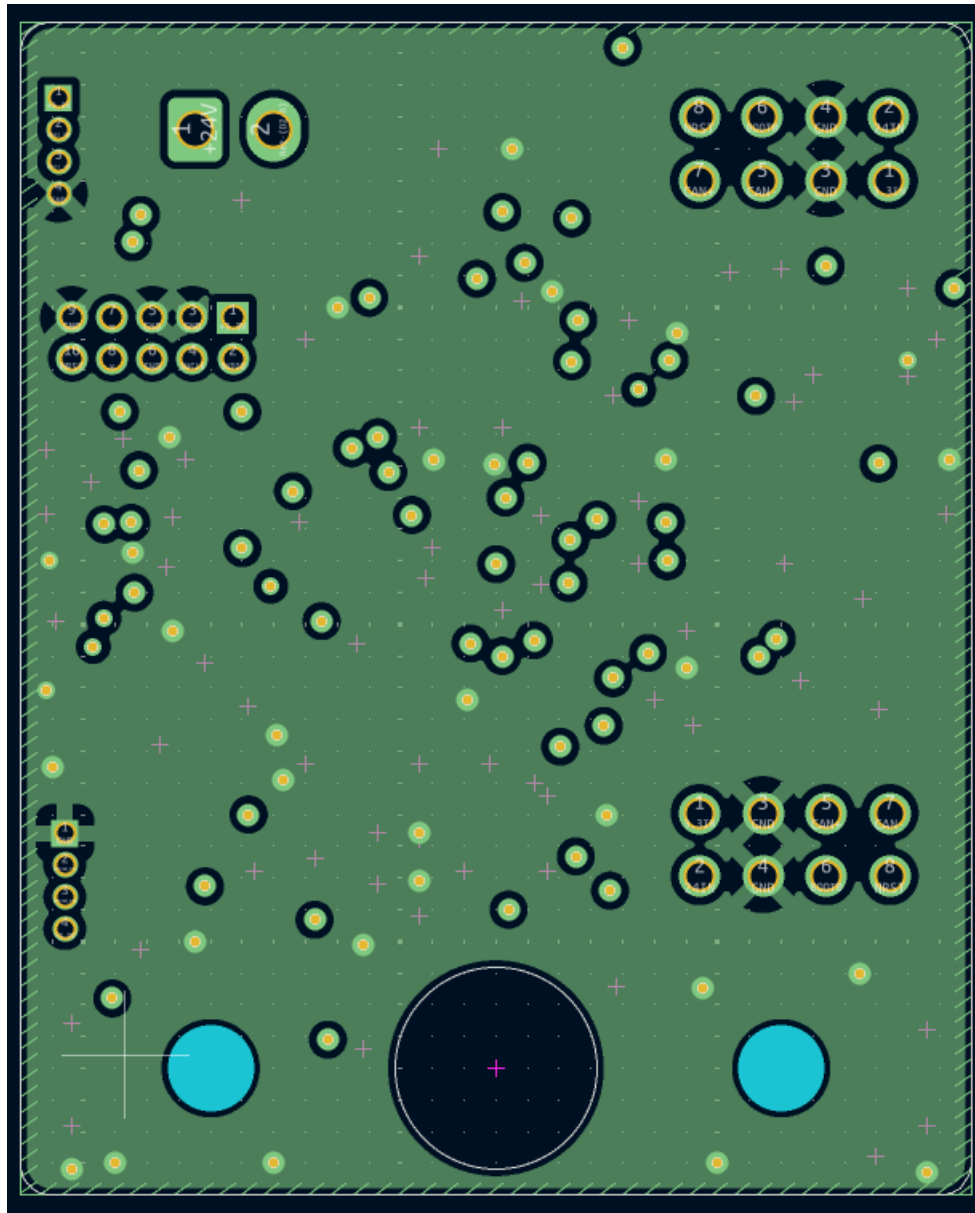

Back

Top Layer:

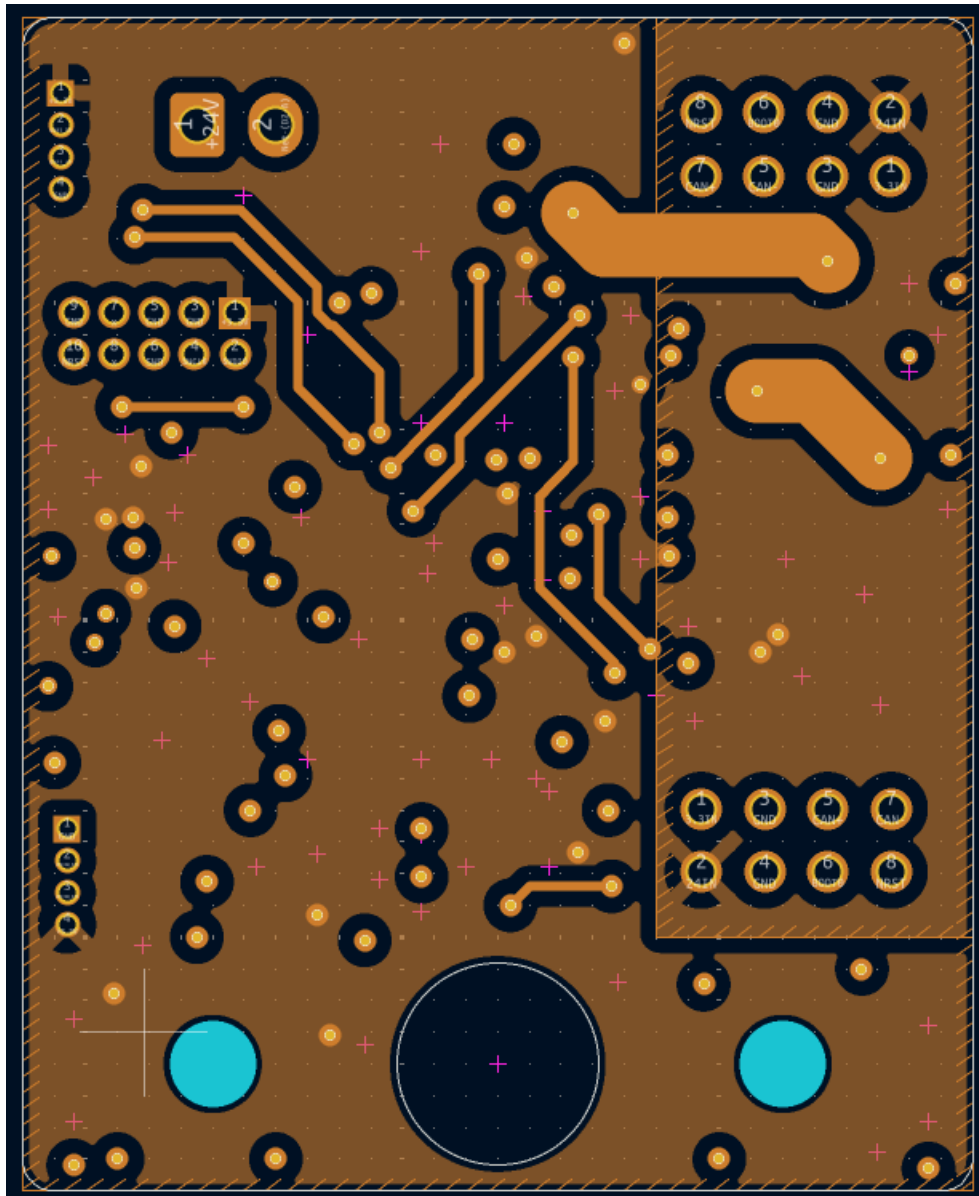

Inner layer 1 (GND):

Inner Layer 2 (Power plane with a few signal lines plane to the right is 24V passthrough, the rest is 3.3V)

Back (Singal surrounded by ground fill)
